GSTIN 07AKSPT0530G1Z0 • Registered supplier on the Government e-Marketplace (GeM)

An integrator that finishes the whole room

Amigo Audio Visuals designs, supplies, installs and commissions audio visual, broadcast, IT and surveillance systems for academic institutions, government organisations, PSUs and enterprises across India. We are a registered supplier on the Government e-Marketplace.

Most AV companies quote the equipment and leave the room to somebody else. We take the civil work, the acoustics, the air-conditioning, the furniture and the electrical as part of the same contract – so there is one scope, one schedule and one person answerable at handover.

Single point of responsibility

AV, acoustics, HVAC, interiors and IT under one contract. No coordination gaps between vendors.

Engineered, not assembled

Signal flow drawn and equipment selected in-house, by someone certified on the platforms we deploy.

Built for institutional buying

GeM contracts, tender specifications, BOQ compliance, onsite warranty and staff training.

SECTORS WE SERVE

Auditoriums & Performing Arts

Board & Meeting Rooms

Classrooms & Training Centres

Studios & Control Rooms

Libraries & Public Spaces

LEADERSHIP

Adesh Tyagi

Founder & CEO

Over 14 years in technology, including North India Head at Lightware Visual Engineering, the European manufacturer of professional AV signal management. Certified by Lightware, Shure, Audinate (Dante) and the SDVoE Alliance. He still draws the signal flow and walks the site himself.

Solutions

01 Video Conferencing Rooms

Huddle rooms, meeting rooms and board rooms with crystal-clear audio and video — including Look-At-Me camera systems that automatically frame whoever is speaking.

02 Smart Classrooms

Complete smart classroom builds — interactive panels, audio, lecture capture, plus the furniture, air-conditioning and interiors that go with them.

03 Seminar Halls & Auditoriums

Large-format halls with professional sound reinforcement, multi-camera video, projection and delegate conferencing systems.

04 Recording & Streaming Studios

Turnkey production studios — from civil work and acoustics through to cameras, switchers, encoders and streaming.

05 Acoustics & Interiors

Acoustic treatment and interior fit-out designed around the room's actual sound behaviour, not just its looks.

06 LED Video Walls

Indoor and outdoor LED display systems, supplied and installed with structure, processing and content playback.

07 CCTV & Surveillance

IP surveillance systems with recording, storage and remote viewing for campuses, offices and industrial sites.

08 IT & Office Automation

Desktops, laptops, all-in-one PCs, UPS systems, printers, photocopiers and scanners — supplied, installed and supported.

— VENUES & SPACES WE BUILD

Auditoriums & Performing Arts · Board & Meeting Rooms · Classrooms & Training Centres · Studios & Control Rooms
Libraries & Public Spaces · Industrial & Enterprise Sites

— HOW WE WORK

01

Site survey

We measure the room, the acoustics and the existing services before quoting.

02

Design & BOQ

Signal flow drawn in-house, equipment selected, BOQ written to your specification.

03

Execution

Civil, acoustics, HVAC, furniture, electrical and AV run to one schedule.

04

Commissioning

Tested, handed over, staff trained, with onsite warranty and support.

Projects

ACADEMIC

IIT Delhi — DMS Board Room

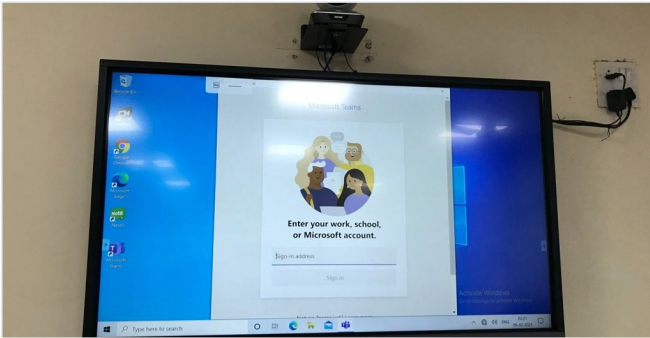

Video conference room for the Department of Management Studies, with table microphones, display and integrated conferencing.

ACADEMIC

IIT Delhi — DRDO VC Room

Video conference room set up at IIT Delhi for DRDO, built for secure, high-clarity remote sessions.

ACADEMIC

IIT Delhi — Biomedical Engineering

Video conference room for the Biomedical department (CBME) with display, camera and room audio.

ACADEMIC

IIT Delhi — CARE Department

Classroom solution for the CARE department plus a video conference room for the Director's office.

ACADEMIC

IIT Delhi — DIA Centre of Excellence, RNI Park

Conference room built around an 86-inch interactive display and a 20x zoom video conferencing camera, with a Look At Me system that turns the camera to whoever is speaking. BXB chairman and delegate

ACADEMIC

IIT Jodhpur — Production Studio

Complete audio and video production studio delivered turnkey: civil works, acoustics, HVAC, lighting, green screen, cameras and streaming.

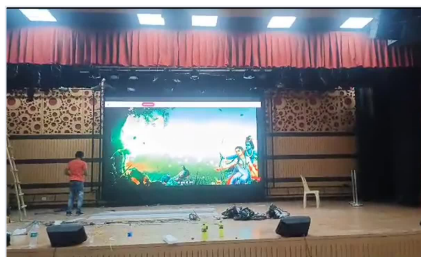

Projects (continued)

ACADEMIC

University of Delhi — Department of Chemistry

120-seater seminar hall used for departmental

ACADEMIC

ACADEMIC

NDDTC Ghaziabad — Smart Classroom

Delivered turnkey on a single contract:

GOVERNMENT / PSU

Bharat Petroleum — VC Rooms

Video conference rooms delivered at the Delhi office, Noida and at Karur, Tamil Nadu.

GOVERNMENT / PSU

HERC, Panchkula

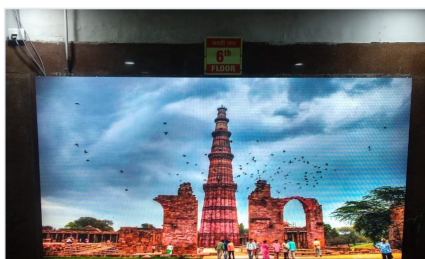

Video conference room and hall with fully integrated AV and HVAC for the Haryana

GOVERNMENT / PSU

NRDC

Multiple conference rooms with comprehensive AV solutions for the National Research

GOVERNMENT / PSU

Central Zoo Authority, Delhi

6 x 3 ft P2.5 LED video wall supplied, installed and commissioned.

GOVERNMENT / PSU

Delhi Public Library

Video conferencing room with wall-mounted display, camera and conference audio.

BROADCAST

Tibet TV — Dharamshala

Broadcast studio and production setup for the Central Tibetan Administration, including switching, streaming and studio displays.

Case studies

IIT Jodhpur — Audio & Video Production Studio

Indian Institute of Technology, Jodhpur

THE CHALLENGE

The institute needed a full production studio, but only had bare shell space — no acoustics, no HVAC, no lighting grid and no AV infrastructure.

WHAT WE DID

We took the project turnkey: civil works, acoustic treatment, HVAC, studio lighting and the complete AV chain — cameras, switching, audio and recording.

THE RESULT

A working production studio delivered under a single contract, with no coordination gaps between civil, mechanical and AV vendors.

IIT Delhi — IRD Conference Room

Indian Institute of Technology Delhi, Industrial Research & Development

THE CHALLENGE

A long boardroom where every seat needs to hear, be heard and see the content — and where meetings are run by people who should not have to call for AV support to start one.

WHAT WE DID

An Evota 110-inch interactive panel as the main display with repeater screens down both side walls, a Lumens PTZ camera, 27 Sennheiser boundary microphones into a QSC DSP, and JBL amplification and speakers. An ATEN HDMI switcher and a USB switcher feed four table cable cubbies.

THE RESULT

The room runs four ways without help: video conference straight from the panel, wireless screen share over Wi-Fi, video conference from a laptop at the table using the room camera and microphones, or plain wired HDMI. We left a one-page guide on the wall with a QR code to the full manual.

Case studies (continued)

Ministry of Food Processing Industries — Conference Room

Ministry of Food Processing Industries, Government of India, New Delhi

THE CHALLENGE

A 24-seat ministry conference room where delegates sit far from the main screen, and where sessions have to be joined remotely without anyone fiddling with a camera.

WHAT WE DID

A Cypress 4x2 HDMI matrix takes two laptop inputs from table cable managers: output one drives the main display, output two feeds four repeater displays and a Wacom Cintiq 24 pen display through a splitter. A Lumens VC-A53 PTZ camera handles video conferencing. Fifteen Sennheiser MEB 114S boundary microphones run into a QSC Core 24F DSP for echo cancellation,

THE RESULT

A Sennheiser MAS 1 Look At Me button, wired through a QSC QIO-GP GPIO interface, turns the camera to whoever is speaking. The Wacom runs over CAT6 using Cypress CH730 extenders, so it can sit up to 100 m from the rack.

NDDTC Ghaziabad — Smart Classroom

National Drug Dependence Treatment Centre, AIIMS

THE CHALLENGE

A bare room that had to become a working smart classroom — and a client who did not want to coordinate a civil contractor, an HVAC contractor, a furniture supplier and an AV integrator separately.

WHAT WE DID

One contract for the whole room. On the AV side: a PeopleLink R86 interactive panel, a PeopleLink iCam WHD 1080 12x PTZ camera, a PeopleLink E-Podium Ultra digital lectern, two UHF wireless microphones, wall speakers, and a Lumens LC100 for lecture capture. On the room side: false ceiling, wall panelling and joinery, three Daikin air conditioners, 25 student chairs plus faculty

THE RESULT

A finished classroom handed over on a single GeM contract worth Rs 34.03 lakh — one vendor, one scope, one point of accountability.
